Safety Instructions

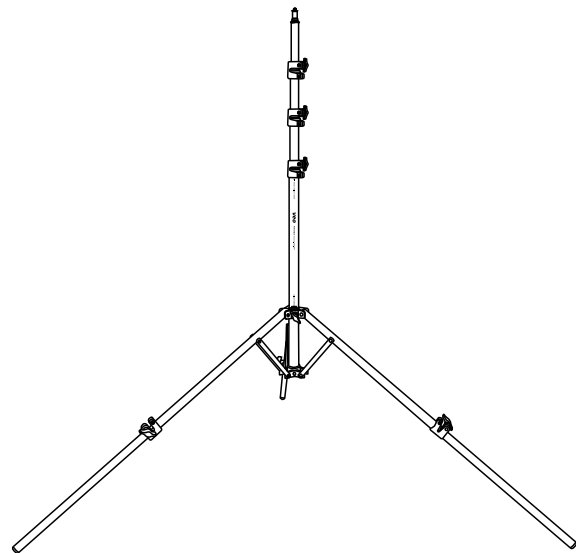

It is important to read the full instructions before operation in order to take full advantage of the tripod and prevent accidental damage.

1. Please note that the portable tripod is only intended for use with the Phone Rig.
2. Please ensure all locking knobs are fully tightened before mounting the Phone Rig.
3. Do not exceed the maximum specified load (see specifications).
4. Please ensure that the tripod is level before mounting the Phone Rig.
5. Please raise or lower the center column slowly when you adjust the tripod height, to avoid your hand being pinched between the locks.
6. Please pay attention to your fingers when you open the base, to prevent them from being trapped.
7. Please don't move the tripod when the Phone Rig is mounted, and center column raised.
8. During use, please always ensure that all knobs and handles are locked tightly.
9. For added stability, fill the included water bag with water and hang it from the knob as shown on page 9 of this instruction manual.
10. Do not leave your product unattended when working where the general public could be endangered. Keep out of reach of children.

Veo Technologies cannot be held liable for any damage to the tripod, the phone rig, other property or personal injury resulting from improper or negligent use of the tripod, or failure to adhere to safety instructions provided herein. You assume full responsibility for taking all necessary precautions to ensure the proper and secure setup of the tripod, phone rig, and any other Veo products.

The box contains the following items. In case any item is found missing, please contact Veo or your local vendor.

Max.Working Height	270cm / 106.3in
Footprint Dia.	156cm / 61.4in
Tube Dia.	19/ 22.4/ 26/ 29.5mm / 0.8 / 0.9 / 1.0 / 1.2in
Leg Tube Dia.	22/ 19mm / 0.9 / 0.7in
Net Weight	2kg / 4.5lb
Maximum Specified Load	2kg / 4.5lb

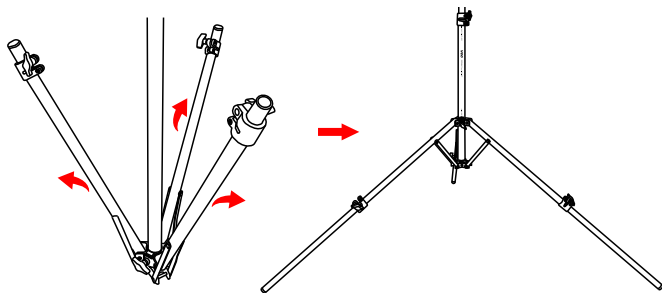

The tripod must always be setup on firm and flat ground.

Opening the base

- ❶ Loosen the central locking knob on the upper bracket.

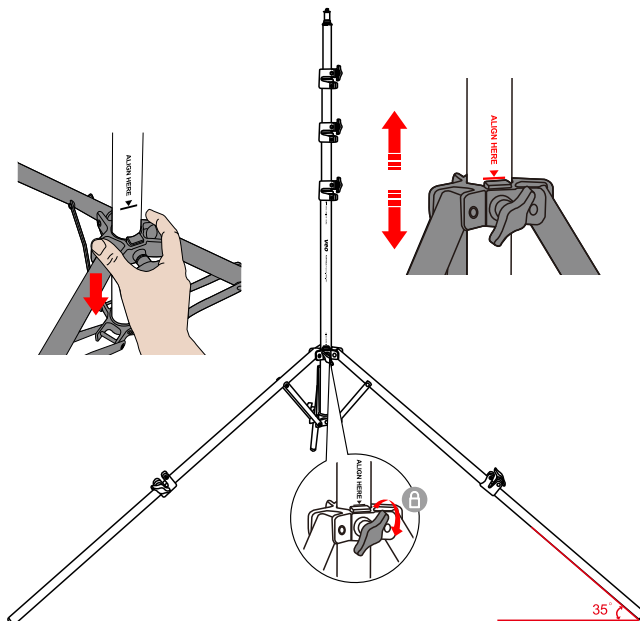

- ❷ Unfold the three tripod legs down and spread the legs outwards.

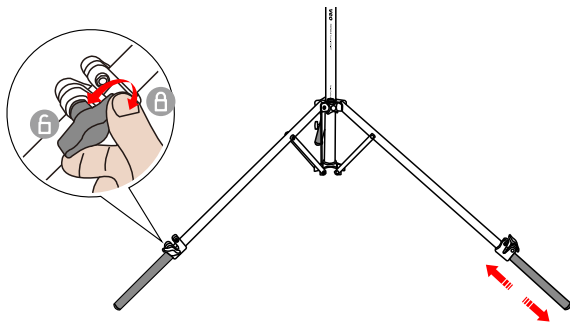

Opening the base

- ❸ To obtain maximum stability, please push the upper bracket down, until it is aligned with "ALIGN HERE" mark (optimal angle between legs and ground is 35°). Tighten the locking knob securely.

Extending the legs

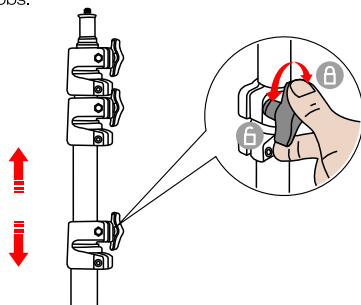

- 1 Loosen the locking knob of leg.
- 2 Fully extend each leg.
- 3 Tighten the locking knob of leg.

Height adjustment

Telescopic columns adjustment

- 1 Loosen the locking knobs to unlock the central column.
- 2 Extend each column to reach your ideal height.
- 3 Tighten the locking knobs.

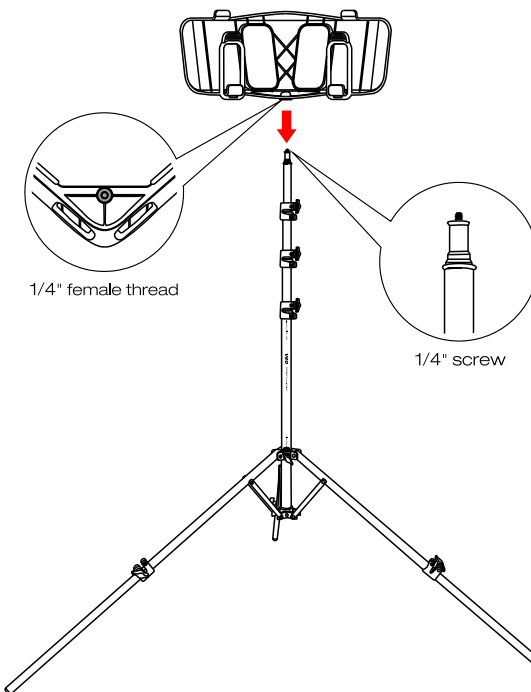

Mounting the phone rig

Please make sure the Phone Rig is tightened on the tripod.

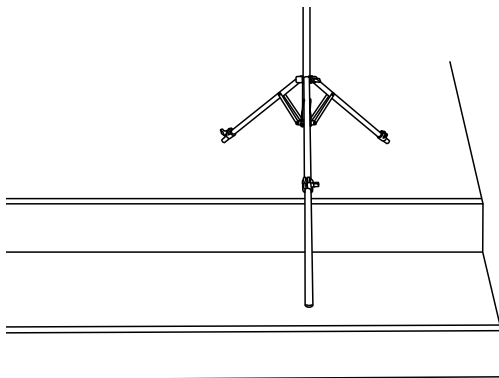

- 1 Mount the Phone Rig onto the tripod using 1/4" female thread.
- 2 The top of the tripod is equipped with a 1/4" screw, which fits the base of the Phone Rig to ensure a secure and stable connection.

The Phone Rig is not included in the tripod kit.

Leveling the tripod

When working on uneven ground, the extendable legs also provide adjustment function, to ensure that the tripod is levelled at all times.

Adding more stability (Water bag)

Fill the water bag with water, and make sure to tighten the screw cap before using it. Then hang water bag on knob according to instruction mark "HANG WEIGHT HERE".
